Profile

Full Stack Developer with more than four years of experience building end-to-end web applications, from database design to production deployment. I have worked on B2B video streaming platforms and, most recently, an e-commerce platform using Medusa, Next.js, and PostgreSQL. I am highly proficient in React, Node.js, and TypeScript, with a strong focus on clean architecture, maintainable code, and scalable solutions.

Professional Experience

Full Stack Developer – MyUrbanScoot

September 2025 – September 2026

- Contributed to an existing e-commerce platform (Medusa, PostgreSQL), building new features end-to-end – from design to deployment – including product catalog, shopping cart, checkout workflows, and a customized back office.
- Conducted load testing with k6 prior to launch to identify performance bottlenecks and validate system reliability under real-world traffic.

Full Stack Developer – Flumotion

July 2022 – November 2022

- Developed new features for a B2B video streaming platform serving clients across Europe.
- Integrated an AI-powered automatic transcription pipeline along with a human review interface for subtitle generation.

Freelance Full Stack Developer – Self-employed

August 2021 – June 2022

- Designed and developed custom web applications end to end, covering database design through production deployment.
- Delivered projects including a booking platform with a private back-office that enabled clients to manage their business independently.

Junior Software Developer – Shooowit SL

March 2020 – July 2021

- Developed and maintained a B2B video hosting and streaming platform, mainly front-end.
- Implemented embeddable video players with client-specific customization, region-based access control, and a real-time chat service for live broadcasts.
- Self-studied backend development, laying the groundwork for the full-stack work in later roles.

Software Development Intern – Shooowit SL

October 2019 – February 2020

- Supported the front-end development team on the same B2B video streaming platform, transitioning into the Junior Software Developer role above.

Education

Bachelor's Degree in Multimedia Engineering – University of Valencia *Graduated September 2025*

Technical Skills

Core stack: React, Node.js, Next.js, Astro, TypeScript, JavaScript, HTML, CSS, SQL, PostgreSQL, MySQL, Medusa, Git, Google Cloud Platform, Railway, k6.

Also worked with: Python, C++, C#, Java.

Languages

Spanish – Native | Catalan/Valencian – Native | English – Professional working proficiency: daily reading of technical documentation; regular communication with international/remote team members
